

Microsoft Dynamics Retail Management System (RMS) Store Operations is the preferred product of **Fred POS**. It offers an easy-to-use, flexible solution that helps you manage operations and performance across all your stores.

## MICROSOFT DYNAMICS RETAIL MANAGEMENT SYSTEM™

Designed to meet changing business needs, this powerful software package delivers the investment protection of a solution that can be adapted to meet the unique requirements of your retail environment.

Store Operations runs as a stand-alone application in individual stores.

Along with automating the full range of point-of-sale (POS) processes, Store Operations enables managers to maintain tight control over inventory, pricing, suppliers, promotions, customer information, and reporting.

### KEY POINT-OF-SALE CAPABILITIES

- Integrated EFTPOS
